

NIKHIL MARATI

DevOps Engineer

Telangana, India | marati.nikhil97@gmail.com | +91 9912614274 | github.com/maratinikhil | linkedin.com/in/marati-nikhil9

PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years supporting AWS cloud operations: deployments, infrastructure setup and compliance for resilient, highly available solutions. Builds and scales CI/CD pipelines (Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps) that cut deployment time 40% across 10+ containerized microservices. Automates infrastructure with reusable Terraform modules, CloudFormation and Ansible, runs containerized workloads on Kubernetes (EKS, Helm) with GitOps delivery via Argo CD, scripts in Python/Bash on Linux, and embeds security guardrails (SonarQube, JFrog Xray) into cloud-native delivery.

PROFESSIONAL EXPERIENCE

DevOps Engineer, Naaima Embedded Technology

Oct 2024 – Present

Client: Dr. Martens — E-Commerce Platform | Telangana, India

- Reduced Jenkins build failures and sped up releases for 10+ microservices by standardizing CI/CD pipeline stages.
- Built GitHub Actions and GitLab CI/CD pipelines for automated build, test and deployment alongside the team's Jenkins pipelines.
- Provisioned an EKS cluster with AWS CloudFormation as versioned templates for repeatable multi-environment setup.
- Deployed microservices on Kubernetes (EKS) with Helm, managing Deployments, Services, Ingress and Secrets.
- Optimized resource consumption by right-sizing EC2 and setting Kubernetes requests/limits to cut over-provisioning.
- Implemented GitOps with Argo CD, syncing Helm manifests from Git to EKS with auto-sync, self-heal and rollback.
- Eliminated configuration drift across Dev/Staging/Prod with reusable, versioned Terraform modules (VPC, EC2, IAM, S3), registry modules where suitable, and centralized remote state with locking for CI-driven plan/apply.
- Automated CI/CD release steps with AWS CodeDeploy and an AWS Lambda function.
- Automated static website deployments with Ansible playbooks.
- Cut deployment time 40% by containerizing 10+ microservices (catalog, cart, checkout) into Docker images.
- Monitored services with CloudWatch, Prometheus/Grafana, ELK (Kibana) and CloudTrail, resolving infrastructure incidents through root-cause analysis before they hit uptime.
- Managed Multi-AZ RDS (MySQL) with failover, backups, snapshots and restore testing, plus DynamoDB backups.
- Configured ALB/NLB load balancing and Auto Scaling groups across AZs to absorb traffic spikes and stay highly available.
- Managed DNS (Route 53), TCP/UDP, SSL/TLS and HTTP/HTTPS, and hardened servers against traffic spikes with least-privilege access.
- Embedded JFrog Xray scanning into the Docker build and registry workflow, catching critical CVEs before production.
- Authored deployment runbooks, owned Jira sprint planning, and enforced Git branching standards across 10 engineers.

CORE TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, IAM, VPC, Security Groups, EBS, EKS, ECR, Route 53, RDS, DynamoDB, Lambda, CloudWatch)

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI/CD, AWS CodeDeploy, Azure DevOps

Infrastructure as Code: Terraform (Providers, Modules, State Management), CloudFormation, Ansible

Scripting: Python, Bash / Shell (automation scripting)

Operating Systems: Linux Administration (Ubuntu, Amazon Linux)

Containerization & Orchestration: Docker, Kubernetes (K8s), Helm, Resource Optimization

Observability & Monitoring: CloudWatch, CloudTrail, Prometheus, Grafana, ELK (Kibana), Incident Response, Troubleshooting & RCA

Security & Compliance: IAM Least-Privilege Policies, Server Hardening, Audit Logging, Vulnerability Scanning

High Availability & DR: Multi-AZ (RDS MySQL), DynamoDB Backups, Snapshots, Automated Backups, Restore Testing, Failover

GitOps / DevSecOps: GitOps (Argo CD), SonarQube, Trivy, JFrog Xray

Version Control: Git, GitHub

Networking & Load Balancing: DNS (Route 53), TCP/UDP, SSL/TLS, HTTP/HTTPS, ALB, NLB, Auto Scaling, Traffic-Spike Handling

Project Management: Jira (Issue Tracking, Sprint Planning, Infrastructure Issue Resolution), Runbooks & Documentation

EDUCATION

Master of Computer Applications (MCA) | 2024

Aurora's PG College, Telangana | CGPA: 6.85

Bachelor of Commerce (B.Com) | 2021

David Memorial Degree College, Telangana | CGPA: 7.76
